WASHINGTON- Congressman Lee Terry (R-NE) issued the following statement on a temporary economic stimulus package passing the House:

"Our economy has a solid foundation, but recently it has slowed. Families are struggling to make ends meet with increasing costs for food, fuel and medical bills. This plan gives relief to the middle-class in the form of rebate checks and will also help small businesses expand and add jobs. The Senate must now act swiftly to make sure there is no delay in reviving the economy," said Congressman Terry.
