Washington -Rep. Lee Terry today voted for a short-term measure to fund the government for three weeks until April 8th while cutting $6 billion in spending. Today's vote will bring the total cuts to federal spending to $10 billion in five weeks.

"We need to get serious about cutting spending. Today's vote continues our efforts to change the way Washington does business. The bill not only cuts spending and ends wasteful, duplicative programs but it also eliminates unnecessary earmarks. Though I would rather see the Senate take action on H.R. 1, which cut $61 billion from current spending levels, today's vote is a step in the same direction," Terry said.
