WASHINGTON- Congressman Lee Terry issued the following statement in response to the Comprehensive American Energy Security & Consumer Protection Act, H.R. 6899:

"I'm disappointed a comprehensive energy bill was not brought to the table. This bill imposes a permanent ban that locks up 80% of OSC oil and gas from development. We need to have an all of the above plan to give to the American people, one that increases the use of alternative fuels, opens drilling and increases conservation efforts. This bill will not make it to the President's desk and is bad for all Nebraskans."
