

WASHINGTON- Congressman Lee Terry (R-NE) has been chosen to serve on the House GOP American Energy Solutions Group, which will craft Republican solutions to lower energy prices for all Americans.

"The United States needs a comprehensive energy plan to become energy independent," said Congressman Terry. "The plan needs to include increasing energy production from traditional, alternative and renewable energy resources. We cannot afford to continue our current levels of energy use without developing new sources and technologies."

"Skyrocketing energy costs continue to hit families and businesses hard," said House Republican Leader John Boehner. "As a member of the Energy & Commerce Committee Congressman Terry is well aware of the energy challenges facing our country. He will be a strong asset to this group as he has shown constant leadership in promoting ideas to lower energy prices and end our reliance on foreign sources of oil."

Members of the House GOP American Energy Solutions Group include:

Rep. Mike Pence (R-IN), Chairman Rep. John Shimkus (R-IL), Co-Chair Rep. Fred Upton (R-MI), Co-Chair Rep. Joe Barton (R-TX) Rep. Michelle Bachmann (R-MN) Rep. Bob Bishop (R-UT) Rep. Marsha Blackburn (R-TN) Rep. Dave Camp (R-MI) Rep. Shelly Moore Capitoll (R-WV) Rep. Mike Conaway (R-TX) Rep. John Fleming (R-LA) Rep. Ralph Hall (R-TX) Rep. Doc Hastings (R-WA) Rep. Cynthia Lummis (R-WY) Rep. Kenny Marchant (R-TX) Rep. Mike McCaul (R-TX) Rep. Devin Nunes (R-CA) Rep. Pete Olson (R-TX) Rep. Steve Scalise (R-LA) Rep. Jim Sensenbrenner (R-WI) Rep. John Shadegg (R-AZ) Rep. John Sullivan (R-OK) Rep. Glenn Thompson (R-PA) Rep. Pat Tiberi (R-OH) Rep. Greg Walden (R-OR)
