

WASHINGTON- Congressman Lee Terry has signed on to support a measure that would prevent House Leaders from using procedural gimmickry otherwise known as the "Slaughter Solution" to pass health care reform. H.Res.1188 would require an up-or-down vote to pass the Senate government takeover health care bill as opposed to having it "deemed passed" through a vote on the rule.

**"What are House Democratic Leaders trying to hide?" said Congressman Lee Terry. "Are there more 'Cornhusker kickbacks' that are being used to buy votes? Despite the will of the people, House Democratic Leadership is recklessly taking matters into their own hands, attempting to shove their government takeover of healthcare down the throats of every American. Members of Congress owe it to our constituents to do the right thing and have an honest and fair vote on health care, not to hide behind procedural tricks."**
