

WASHINGTON- Today Congressman Lee Terry (R-NE) issued the following statement on Neil Moseman being selected to serve as director of the Nebraska Energy Office.

"Energy use and consumption are more important than ever and having this new office will benefit Nebraska and the nation as a whole. Neil has a great understanding of all aspects of energy issues in Nebraska, especially as they relate to agriculture. I have worked with Neil in the past; he is a great person and I applaud Governor Dave Heineman in appointing Neil to such an important and vital position," said Congressman Terry.
